### History

#### #1 - 07/07/2014 09:50 AM - Anonymous

Please be more precise when entering an issue: in which context does the exception happen?

For instance when I start AF3 and close it right after, there is no exception.

Or is it actually the same issue as 2011?

Same solution as for [#2011](#) :

The NP-Exception occurred in NavigatorService.getActiveSaveables().

getActiveSaveables() is called here from the eclipse kernel after the member navigatorViewPart got already null (after it was referencing an object before).

I added a check for navigatorViewPart to be null...
