I don't remember this issue.

(Somehow the explanation is not enough for me... ;-p)

#5 - 11/28/2017 05:30 PM - Anonymous

Who dared to write such an issue!!!?

#6 - 11/28/2017 05:30 PM - Anonymous

Oh.

#7 - 11/28/2017 05:30 PM - Anonymous

;-)

#8 - 11/28/2017 05:31 PM - Anonymous

- Target version changed from AF3 2.11 Post-release to AF3 2.12 Post-release

Seriously: it's about having more than one text line on the components.

I guess from the comment above that it should already be done for the safety cases

#10 - 02/28/2018 08:51 AM - Anonymous

- Target version changed from AF3 2.12 Post-release to AF3 2.13 RC1 (Feature Freeze)

#11 - 03/05/2018 11:51 PM - Anonymous

- Assignee changed from Anonymous to Florian Hölzl

- Target version changed from AF3 2.13 RC1 (Feature Freeze) to AF4 Requirements

I spent way too much time during December trying to implement it. It's quite difficult with AF3 implementation, but for what I found in google when trying to do this, it should be rather easy with JavaFX.
@Flo: I would say that you should keep this in mind as a SystemFocus Requirement

#12 - 06/13/2018 04:24 PM - Simon Barner

- Related to Feature #3433: Auto Layouter: Consider label size added

#13 - 06/13/2018 04:27 PM - Simon Barner

- File editpart-auto-size.patch added

Resulting from a discussion in [#3433](#), I have attached a prototype implementation that automatically resizes EditPart s to the length of their label.

However, I do not think that this is what we want from a usability point-of-view since it prevents one from having a small element whose label is abbreviated with "..."
