<b>Description</b>			
So far, TransceiverPort@s can only be seen in the virtual link tree-viewer (see #2659), or on in the annotations view of the corresponding deployment. However, a native editor should be provided that extends concept currently used for logical @Port to Transceiver mappings as follows:			
<ul style="list-style-type: none"><li>• Definition of TransceiverPort@s for a @Transceiver (e.g., ports of a partition communication interface)</li><li>• Mapping of a logical Port to a TransceiverPort</li></ul>
