<b>Description</b>			
- Select a component - create a test suite specification - besides the "state coverage" GUI there used to be a random GUI, put it back - seems all the methods are implemented, only the GUI needs to be added

Classes to review:

org.fortiss.af3.testing.compose.TestSuitePrototypeProvider  
org.fortiss.af3.testing.compose.TestSuiteSpecificationCompositor

@Johannes: can you please test if it works for you (hopefully for some big project). If so I will assign it to Filip to close it.

State and Transition Coverage still do not work as before.

Random Test Case Generation works now without exception. However the generated test cases are not complete. (see attached screenshot)  
I used the ACC model for generating.
