

AF3 Phoenix - Change Request #3870

Change Request # 3878 (Closed): [UI] Collection task to switch gef based editors to the new JavaFX-based editors (LWFXEF)

Feature # 3815 (Closed): [Kernel] Add LWFXEF framework from SystemFOCUS to kernel.common.ui

[Kernel] LWFXEF base class delegating to transformation service

11/25/2019 01:15 PM - Florian Hölzl

Status:	Rejected	Start date:	11/25/2019
Priority:	Normal	Due date:	
Assignee:		% Done:	90%
Category:		Estimated time:	0.00 hour
Target version:	AF3 2.17 (Plugin Consolidation)		
Description			
If a graphical editor should be able to display elements from other plugins, there needs to be a mechanism to provide visuals and controllers in a pluggable way. We use transformation service to realize this pluggability. This mechanism mainly replaces the use of "tooling.kernel.editpartFactory" extension point.			

History

#1 - 11/25/2019 01:15 PM - Florian Hölzl

- Tracker changed from Bug to Change Request

#2 - 11/28/2019 06:46 PM - Alexander Diewald

- Status changed from In Progress to Feedback

- % Done changed from 0 to 90

Please provide some example code, or explain to me on Monday how client code would look like. It is not possible for me atm to provide a review of the approach.

#3 - 11/28/2019 06:46 PM - Alexander Diewald

MR: https://git.fortiss.org/af3/kernel/merge_requests/75

#4 - 12/09/2019 09:45 AM - Alexander Diewald

- Status changed from Feedback to In Progress

- Assignee changed from Florian Hölzl to Alexander Diewald

#5 - 01/13/2020 11:35 AM - Simon Barner

- Status changed from In Progress to Resolved

- Assignee changed from Alexander Diewald to Johannes Eder

Resolved in [#3883](#). Please reject.

#6 - 01/13/2020 04:35 PM - Johannes Eder

- Status changed from Resolved to Rejected
