<b>Description</b>			
Create tooltip on channels which describes how bendpoints for re-routing can be created.			
<i>A bendpoint can be created via ctrl+left click. It can be removed via ctrl+right click.</i>			

#### History

- Status changed from New to In Progress

I will implement an in-place help feature for graphical editors that I already wanted to do. It will be more reliable than tooltips, which are not that perfect in JavaFX (strange delay and graphics).

In the 3969 kernel branch there is now a feature for in-place help for graphical editors.

During the viewer initialization the help text can be set, e.g., ComponentStructureFXEditor.java

```
protected void customizeViewer() {
    DiagramViewerFeatures features = viewer.getFeatures();
    features.setIndicatorSpacing(new Dimension2D(12, 12));
    features.setBackgroundColor(LIGHTGRAY);
    features.setHelpText("A two-line\nhelptext.");
}
```

I did only implement the kernel part. Editor-specific must be done by somebody.

##### #3 - 04/06/2020 03:38 PM - Johannes Eder

- Status changed from In Progress to Resolved

- Assignee changed from Johannes Eder to Alexander Diewald

Added help texts in component editor.
