<b>Target version:</b> AF3 2.18 - Feature Freeze	
<b>Description</b>	
<b>Purpose</b>	
In some cases, AF3 shall be used primarily as a DSE tool. For such use cases, the user shall be distracted as little as possible. Hence, the DSE perspective shall be loaded after starting AF3 and a given DSE project shall be imported (a DSE project is a part of an AF3 project).	
<b>Implementation Details</b>	
<ul style="list-style-type: none"><li>The perspective switch will be done programmatically, i.e. the existing eclipse switch to define the initially shown perspective will not be used.</li><li>Similar to executing a DSE via CLI switch, the AF3 project, and the DSE must be given.</li></ul>

IFF you have time. It is based on the CLI implementation of [#3993](#) (Must be merged first). This change allows loading a given DSE and presenting the DSE perspective as the initial one.

Testing:

- Load the ACC example and create a DSE.
- Add the switch and argument "--loadDSE "ACC/DSE"" to the arguments of the run config and start AF3.
- The initially shown perspective should be the DSE perspective and the DSE should be loaded.
