

Design Space Exploration - Change Request #4033

[DSE-TestGen] Keep input model copies in the AF3 project

06/30/2020 02:20 PM - Alexander Diewald

Status:	Closed	Start date:	06/30/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.50 hour
Target version:	AF3 2.18 - Feature Freeze		
Description			

History

#1 - 06/30/2020 02:30 PM - Alexander Diewald

- Subject changed from DSE-TestGen: to [DSE-TestGen] Keep input model copies in the AF3 project
- Status changed from New to Resolved
- Assignee set to Alexander Diewald
- % Done changed from 0 to 100

If using the generated DSE TCs, the containment of the input models such as the ComponentArchitecture is changed to the DSE. By that, the input models are not visible in the AF3 modelling perspective.

In order improve UX in terms of user expectation, only copies should be added to the DSE node at the cost of a doubled file size.

Testing instructions:

- Go the run configuration of your AF3 dev installation.
- Create a duplicate launch config for AF3
- Select a different runtime-workspace.
- Add "--gen-dse-testcases --shutdown" to the arguments.
- Start AF3 from the just created configuration.
- After AF3 was shut down, import one of the created AF3 Projects (Test Cases).
- The Imported Project should have a ComponentArchitecture, etc. visible in the Model Navigator.

#2 - 06/30/2020 02:33 PM - Alexander Diewald

- Estimated time set to 0.50 h
